

# Customized Drive Solutions

## Engineered Drive Systems for Your Mixing Application

### All from one source

- Efficient Systems
- Transformer
- Drive Cabinets
- Mixer Drive
- Cable Tray / Cable Engineering

**300+ Retrofit & New Drive Systems Successfully Installed**

## YOUR BENEFITS

- Customized Drive Systems for every application based on the latest energy saving regulations
- Drive Solutions from different suppliers specially designed for customer needs
- Higher availability due to network-independent feed
- Reduced downtime due to customized spare part packages & 24/7 hotline
- M-GUARD Remote Maintenance System for fast & reliable service cases

The **HF MIXING GROUP** offers Customized Drive Solutions for sustainable retrofit and new projects. The **Transformer** layout is customized to include temperature monitoring and pre-built connections. The **VFD Cabinet** has an optimized drive function integrated, a standardized interface and a visualization for easy implementation to the Customer Control System. The **Motor** dimensioning based on the latest energy saving regulations offers an additional extensive data logging of temperatures and cooling and noise optimized construction for highest standards.
