

**MIXING GROUP**

# **Intelligent controller for state-of-the-art mixing technology**

**NEW!**

**The intelligent temperature controller - iTC**

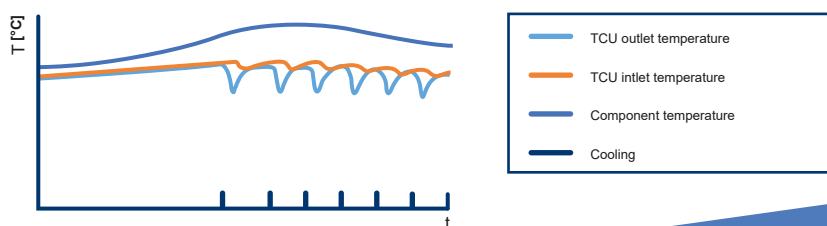

The intelligent temperature control unit

# The intelligent temperature controller - iTC

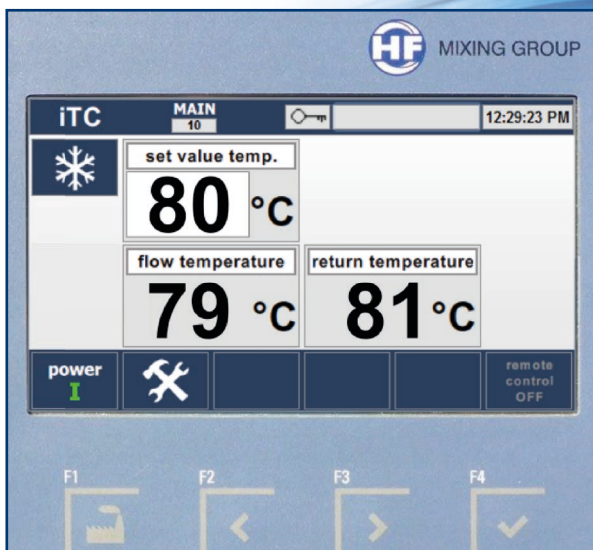

## Temperature control unit with digital intelligent controller - iTC

- iTC especially developed for HF MIXING GROUP equipment
- Temperature control depending on the mixing process
- Optimal energy consumption
- Trouble-free integration into the mixing line controls
- Frequency regulation of the pump as an additional control parameter

Available for new and retrofit installations

In order to operate high quality mixtures, it is essential to use optimally designed temperature control units.

- + Easy installation
- + Optimised operation communication and maintenance
- + Regulator optimisation
- + No heating phases during the mixing cycle
- + Reducing operating costs
- + Process data recording
- + Short commissioning time
- + Fully integration into HF MIXING GROUP control concept
- + Standard controller for all HF MIXING GROUP temperature control units
- + Available for different TCU's manufactures
