

# High precision wear measurement

Digital Gap Measurement | 3D-Rotor-Digitisation | Hydraulic Inspection & PLC-Programme-Check

## YOUR BENEFITS

- ✓ Increased lifetime of your machines
- ✓ Precise image of present condition of the rotors
- ✓ More precise runtime prediction working conditions
- ✓ Current fill capacity can be determined precisely
- ✓ Fast and innovative measurement technologies to optimize your maintenance plan & reduce costs
- ✓ Precise repair plan based on digital measurements ensure repair quality
- ✓ Fast analysis & repair on-site

## SERVICES FOR MACHINES

### Digital Gap Measurement

- Individual count of measuring points
- Exact distance measurement
- Automatic operation

### 3D-Rotor-Digitisation

- Exact scanning of the rotors
- Comparison of the result between current and original conditions

### Hydraulic Inspection

- Visual inspection
- Check / Detection / Adjustments
- Oil analysis
- Assessment of ram pressure device, inner leakages, pumps, cylinders and accumulators
